032788-00001	1	Region 9: On December 18, 2017, Stanislaus CAC's office received a complaint about a possible rodenticide exposure to a horse, resulting in death. The owner reported that the horse had sweating and twitching symptoms and had the horse euthanized on December 5, 2017. The owner reported that the horse was a 9-year-old female show horse (Warmblood Jumping Horse) valued at \$25,000 to \$30,000 dollars. The horse was sent out for a necropsy and the toxicological analysis tested positive for zinc phosphide. Stanislaus CAC staff determined that Prozap Zinc Phosphide Oat Bait was used in an almond orchard adjacent to the horse owner's property line. Stanislaus CAC staff determined that the almond orchard property operator had six violations. Stanislaus CAC closed this case as of July 24, 2018.
